

SOLARIS BARREL HANDLER

Quality Attachments, Parts & Customer Service

The Solaris Barrel Handler allows you to scoop up liquids and solids quickly and easily. The Solaris Barrel Handler rotates up to 300 degrees. With the optional insert, it will adapt to handle 30-gallon drums. The Solaris Barrel handler is ideal for the oil, scrap iron and hazardous waste industries. You can scoop up waste in solid or liquid form safely from the operator's seat of your skid steer loader. The Barrel handler will not damage plastic or metal barrels and allows you to pour liquids or solids with precision. Plastic barrels will not slip because of the unique barrel lift support.

EZ-0002 Barrel Handler pictured here with a rotating skid steer base. Handles 30 & 55 gallon & plastic barrels securely, 178 lbs. without the base.

SOLARIS BARREL HANDLER
